“Creating moments that make you smile!”

The Tropical Hangouts were invented, designed and produced by the entrepreneurs at 4LittleBirds, based in Amsterdam. 4LittleBirds was originally formed by four friends, all with a strong passion to produce from the root philosophy of: ‘Creating products that make you smile’.

In our initial period we spend time in the Caribbean (SXM) for half a year at our favorite beach bar. Between two palm trees we hung a wonderful hammock. Because of the atmosphere and the comfort, this hammock was a popular spot. Unfortunately, one hammock is of course far beyond social, but due to a lack of hanging points, which is often the case, we have implemented this solution into our Tropical Hangout product line.

4LittleBirds develop and sell a wide range of products. Given the success of the Tropical hangout product line (Outdoor Living line), a separate trade name has been established for this. The Tropical Hangout outdoor living line is unique and distinguished by itself in respect of the standard options. The perception and experience of the users is the focal point. The social aspect is highly important to us.

Now we all enjoy a wonderful time together with our friends and family and create memories...
The atmosphere that it creates radiates equally to the other people and its location.

Tropical Hangout

Our strong need for new innovative sustainable products ensures that your company will always distinguish itself within your segment or simply at your home!

The ideal place for a hammock is of course a garden between two large trees, five meters apart. Because few have this, hammocks with their own standard are ideal. You can even rock in the wind on a roof terrace.

in a traditional hammock you usually lie diagonally. This way your back stays straight: on your back, side or even on your stomach like Latin Americans do who sometimes sleep in a hammock all their lives. Contrary to the prevailing opinion, a hammock is not bad for the back, precisely because it distributes your weight evenly. For example, it has been found that newborns prefer a hammock over a flat mattress. According to an American study, the hammock is the ideal place for a siesta: the rocking ensures that you fall asleep quickly and deeply.

The word hammock sounds one hundred percent English, but comes - just like the French hamac, the English hammock and the Spanish amaca - from the Indian language Taíno, from the word hamaca. Via hammock, that eventually became hammock.

DURABILITY

WHEN QUALITY MEETS QUALITY

Sustainability is a very important element in the development of the Tropical Hangout product line or outdoor living. By using only high-quality materials with a long service life, you create the optimum result. If the Hangout is properly maintained, the frame can last a lifetime.

The materials have been carefully selected for you. The strong frame is a combination of stainless steel and aluminum. In addition, the sleeves are made of high-quality outdoor fabric.

This is also applied in the luxury yacht construction. The Hammocks are hand made and come from Brazil. These are 100% cotton and handmade. Only the best is good enough! Of course our product has been tested for safety and quality. That is why we have developed and tested the Hangout sustainably up to 2100 kg!

The unit can be placed on any location. The surface is not required to be 100% level. This makes it ideal to find the right spot. Due to its solid construction, the unit can also be relocated without disassembling.

Powerful fact

Study shows that a small power nap equals 200 mg of caffeine!

THE TRUE ENJOYER

The Tropical Hangout | XL has been specially developed for the true enjoyer. When you take a seat in the Hangout / hammock you experience the ultimate comfort feeling through the spacious hammocks of 230 cm long and 150 cm wide. The hammocks themselves are so large that you can enjoy two people in them. Especially in combination with the add-ons you will not miss out!

The Tropical Hangout XL is our most selling model and is ideal for resorts, beach clubs, holiday parks, wellness centers and luxury hospitality industry.

Powerful fact

According to an American study, the hammock is the ideal place for a siesta: the rocking ensures that you fall asleep quickly and deeply.

TROPICAL HANGOUT | XL

TROPICAL HANGOUT | AIR CHAIR

ONLY THE BEST IS GOOD ENOUGH

The Tropical Hangout | Because of the sitting position instead of a lying position, Air Chair offers an ideal alternative. Because of the more active upright position, the Air-Chair can also be used for (business) meetings and brainstorm sessions or just a place to get to know each other.

Yet with the Air-chairs you keep the relaxing vibes that make our line so unique. In addition, they sit fantastic. The Air chairs are also a nice change when multiple constructions are placed on, for example a beach or leisure park.

The Tropical Hangout Air Chair is perfectly suited for office spaces, airport terminals and the leisure parks

POWERNAP is sooo good!

No way a hammock makes the staff more productive! But is really a proven fact.

Indeed, there is a NASA study that shows that a small power nap of 26 minutes increases productivity by 35%. And another study shows that a small power nap equals 200 mg of caffeine!

What I mean is that all the top companies (the largest and most successful in the world) have created a place where staff can chill. This staff is happier, more productive and the company has virtually no turnover.

Powerful fact

A small power nap of 26 minutes increases productivity by 35%.

TROPICAL HANGOUT | HOT SPOT

A PLACE WHERE STORIES COME TO LIFE

The Tropical Hangout | Hotspot is unique in its kind. Relaxing together with the entire family in the Hotspot is a fantastic experience.

Because of the plateau with a diameter of no less than 3 meters, there is room for everyone.

It can be compared to a large sofa or even cozy with each other around the fire. Such a place where stories come to life even in the late hours.

TWO IS A PARTY, FOUR IS A FIESTA

The Tropical Hangout | Quattro is our largest model with 4 hammocks! Since many people travel the world in an even number, this offers the ideal solution so that everyone can optimally enjoy their lounge experience.

TROPICAL HANGOUT | QUATTRO

TROPICAL HANGOUT | LAGOON

NO STRINGS ATTACHED...

The Tropical Hangout | We have developed Lagoon for the really high-end locations. With this model, the finish of the product has been optimally looked into, with the biggest advantage being that no cables are used.

This makes the design look more spacious and free, for an optimal experience. The seating comfort and experience is of course the same as the XL version.

The Tropical Hangout | Lagoon has been specially developed for high end locations such as (beach) resorts and wellness centers.

“ FACTS

JUST ANOTHER BUNCH OF FACTS TO MAKE YOU THINK!

1. Reduce Stress

Stress is a part of everyone's life. Whether it's from school or work, stress is something we all deal with. However, hammocks have been proven to help relax faster and reduce unnatural stress levels from the body. Less stress means more happiness and improved quality of life.

2. Improve Your Sleep

Due to the natural rocking motion and zero pressure points, hammocks help you fall asleep quickly and drastically improve the quality of sleep compared to a normal mattress. A better sleep means you'll wake up with more energy and a positive attitude.

3. Improve Blood Circulation

A hammock will elevate your upper body and allow for better circulation to the head. This has tons of health benefits such as getting rid of congestion, reduces toxins in the body and improves blood pressure.

4. Help With Muscle Aches

Due to having zero pressure points, hammocks force your body to relax and can help improve back and joint aches. So long to waking up with back pain or muscle aches.

5. Improve Your Focus

The swaying motion of a hammock triggers the prefrontal cortex of the brain, which applies focus to your mental state. Also since you're getting a better sleep in a hammock, you're going to have increased energy to focus and therefore increase overall productivity.
